

Cooper Hepworth

(208) 604-6085 | cooperhepworth97@gmail.com | Blackfoot, ID | www.linkedin.com/in/cooper-hepworth | <https://github.com/CSHepworth/Portfolio>

Summary

Data Analyst with experience in software engineering and business analysis, skilled in SQL, Python, R, and cloud technologies. Adept at building predictive models, cleaning and analyzing large datasets, and communicating insights to both technical and non-technical audiences. Recognized for problem-solving and delivering data-driven solutions that improve business outcomes.

SKILLS & CERTIFICATIONS

- Technical: SQL, Python, R, Pandas, Excel, Tableau, Power BI, AWS, Machine Learning
- Certifications: CompTIA Data+ | Udacity Data Analytics Nanodegree | AWS Cloud Practitioner | Google IT Support

PROFESSIONAL EXPERIENCE

Software Engineer - Stukent | Idaho Falls, ID December 2022 – April 2023

Built web applications for an education technology website with an emphasis on style and user experience. Developed web applications with the Angular framework. Focused on developing student interactions and bug fixes.

- Developed 20+ interactive features in Angular to improve student simulation engagement.
- Automated JSON data correction scripts in Node.js, saving engineers 10+ hours/week.
- Configured course product templates that would change the way each simulation functioned.
- Configured course product templates, enabling faster simulation customization.
- Collaborated with product owners in Agile SCRUM sprints to meet project deadlines.

Business Analyst Intern – Stukent | Idaho Falls, ID July 2021 – August 2022

Modeled complex algorithms in Excel for replicating business functions. Worked closely with subject matter experts and product owners in designing algorithms. Collaborated with software engineers to implement algorithms into educational simulations.

- Recognized as an Outstanding Employee of the Month for innovative algorithm design.
- Modeled complex business functions in Excel using macros and flowcharts, later integrated into simulations used by thousands of students.
- Collaborated with engineers to implement algorithms, improving accuracy of educational business models.
- Presented algorithm functionality to stakeholders, ensuring alignment and successful implementation.

EDUCATION

Bachelor of Science in Data Analytics July 2023 – May 2025

Western Governors University | Salt Lake City, UT

- Coursework: Advanced Data Management, Machine Learning, Data Governance, Cloud Foundations, Algorithms

Software Development Full-Time Online Program (Coding Bootcamp) August 2022 – November 2022

Coding Dojo | Bellevue, WA

- Full-stack curriculum: Web Fundamentals (HTML, CSS, JavaScript), Python (Flask), C# (ASP.Net), MERN stack

PROJECTS

Unsupervised Machine Learning Project

<https://github.com/CSHepworth/Portfolio/tree/0a0d40147841cf445b6c75c49c550f92b8778f61/Unsupervised%20Project>

- Cleaned and preprocessed a German demographic dataset.
- Applied clustering algorithms (K-means, DBSCAN) to uncover demographic spending patterns.

- Generated insights for potential segmentation strategies.

Analysis of Formula One Drivers vs Constructors Impacts on Race Time

<https://github.com/CSHepworth/Portfolio/tree/0a0d40147841cf445b6c75c49c550f92b8778f61/WGU-Capstone-Project>

- Analyzed 26,000+ race results to evaluate whether drivers or constructors had greater impact on performance.
- Built mixed-effects models in R, quantifying variance contributions and visualizing results.
- Delivered statistical evidence supporting constructor influence on race times.
